

POS Terminal Mounts

Adding peripherals to POS terminal workstations

An integrated turntable for the Toshiba ST-A10 TouchPOS

Additional Peripherals

Integrating additional peripherals and adding adjustment functionality to POS Terminals is not always easy.

SpacePole® offers a range of ergonomic and flexible products that makes this simple.

Providing a 180° rotational turntable and integrating peripherals such as Payment terminals or screen displays into one single unit gives retailers different options when installing POS terminals.

This flexibility enables Ergonomic Solutions to create systems that are ideal for many environments, such as

food service, hospitality, speciality, convenience and department stores.

Key Features

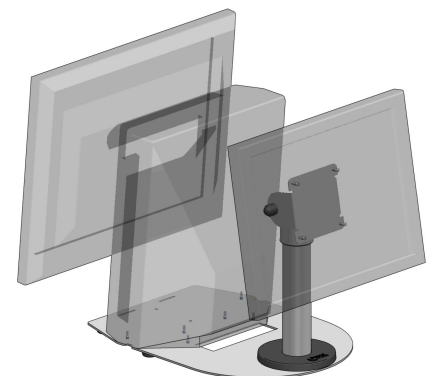

- All technology is securely attached to the plates, retaining maintenance access
- Integrates multiple peripherals such as pin pads, display screens, printers, as required
- 180° rotation capability
- Bolt-down, 3M tape or free-standing options are available
- Full cable management
